New requirements affect Residential Parking Permit Policy for local streets

INDIANAPOLIS - The City of Indianapolis, Department of Metropolitan Development (DMD), has announced a change in the Residential Parking Permit Policy for homes adjacent to local streets affected by a Board of Public Works resolution.

The policy, adopted by the Board of Public Works in 1998, authorizes resident permit parking along select City-owned streets throughout Indianapolis and Marion County. This type of permit parking typically occurs near schools, colleges, and universities, or in neighborhoods that lack off-street parking. DMD will administer the parking permits through its Division of Permits.

The altered policy now requires residents in the affected areas to complete an application from DMD in order to receive a parking sticker. **The new parking stickers are effective January 1, 2002.** Applications require the following documentation:

- verification of current residence (valid Indiana operator's license, current picture ID demonstrating current address, utility bill, paycheck receipt);
- verification of current vehicle registration; and
- telephone number.

Residents will receive parking stickers each year. In addition, each applicant may receive up to two visitor passes on an annual basis.

Specific streets affected by the policy change are listed on the attached pages.

To receive an application, or for more information, please contact 327-8324
